Software effort estimation is a key element of software project planning and management. Yet, in industrial practice, the important role of effort estimation is often underestimated and/or misunderstood.

In this book, Adam Trendowicz presents the CoBRA method (an abbreviation for Cost Estimation, Benchmarking, and Risk Assessment) for estimating the effort required to successfully complete a software development project, which uniquely combines human judgment and measurement data in order to systematically create a custom-specific effort estimation model. CoBRA goes far beyond simply predicting the development effort; it supports project decision-makers in negotiating the project scope, managing project risks, benchmarking productivity, and directing improvement activities. To illustrate the method's practical use, the book reports several real-world cases where CoBRA was applied in various industrial contexts. These cases represent different estimation contexts in terms of software project environment, estimation objectives, and estimation constraints.

This book is the result of a successful collaboration between the process management division of Fraunhofer IESE and many software companies in the field of software engineering technology transfer. It mainly addresses software practitioners who deal with planning and managing software development projects as part of their daily work, and is also of interest for students or courses specializing in software engineering or software project management.

From reader reviews:

Jose Reed:

Information is provisions for folks to get better life, information presently can get by anyone at everywhere. The information can be a information or any news even a huge concern. What people must be consider while those information which is inside former life are challenging be find than now is taking seriously which one would work to believe or which one the particular resource are convinced. If you receive the unstable resource then you buy it as your main information we will see huge disadvantage for you. All those possibilities will not happen within you if you take Software Cost Estimation, Benchmarking, and Risk Assessment: The Software Decision-Makers' Guide to Predictable Software Development (The Fraunhofer IESE Series on Software and Systems Engineering) as the daily resource information.

Donald Andrews:

Reading a reserve tends to be new life style within this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Using book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. The authors on this planet always try to improve their expertise in writing, they also doing some investigation before they write on their book. One of them is this Software Cost Estimation, Benchmarking, and Risk Assessment: The Software Decision-Makers' Guide to Predictable Software Development (The Fraunhofer IESE Series on Software and Systems Engineering).

Vickie Reed:

Software Cost Estimation, Benchmarking, and Risk Assessment: The Software Decision-Makers' Guide to Predictable Software Development (The Fraunhofer IESE Series on Software and Systems Engineering) can be one of your beginning books that are good idea. All of us recommend that straight away because this guide has good vocabulary which could increase your knowledge in vocabulary, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to place every word into joy arrangement in writing Software Cost Estimation, Benchmarking, and Risk Assessment: The Software Decision-Makers' Guide to Predictable Software Development (The Fraunhofer IESE Series on Software and Systems Engineering) however doesn't forget the main level, giving the reader the hottest as well as based confirm resource details that maybe you can be one among it. This great information can certainly drawn you into fresh stage of crucial considering.

Deborah Hayes:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and

information coming from a book. Book is created or printed or outlined from each source this filled update of news. In this modern era like today, many ways to get information are available for a person. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just searching for the Software Cost Estimation, Benchmarking, and Risk Assessment: The Software Decision-Makers' Guide to Predictable Software Development (The Fraunhofer IESE Series on Software and Systems Engineering) when you necessary it?
