Developing Statistical Software in Fortran 95 (Statistics and Computing)

David R. Lemmon, Joseph L. Schafer

Developing Statistical Software in Fortran 95 (Statistics and Computing) David R. Lemmon, Joseph L. Schafer

Many books teach computational statistics. Until now, however, none has shown how to write a good program. This book gives statisticians, biostatisticians and methodologically-oriented researchers the tools they need to develop high-quality statistical software. Topics include how to: Program in Fortran 95 using a pseudo object-oriented style Write accurate and efficient computational procedures Create console applications Build dynamic-link libraries (DLLs) and Windows-based software components Develop graphical user interfaces (GUIs) Through detailed examples, readers are shown how to call Fortran procedures from packages including Excel, SAS, SPSS, S-PLUS, R, and MATLAB. They are even given a tutorial on creating GUIs for Fortran computational code using Visual Basic.NET. This book is for those who want to learn how to create statistical applications quickly and effectively. Prior experience with a programming language such as Basic, Fortran or C is helpful but not required. More experienced programmers will learn new strategies to harness the power of modern Fortran and the object-oriented paradigm. This may serve as a supplementary text for a graduate course on statistical computing. From the reviews: 'This book should be read by all statisticians, engineers, and scientists who want to implement an algorithm as a computer program. The book is the best introduction to programming that I have ever read. I value it as one of my important reference books in my personal library.' Melvin J. Hinich for *Techonmetrics*, November 2006 'Overall, the book is well written and provides a reasonable introduction to the use of modern versions of Fortran for statistical computation. The real thrust of the book is building COM interfaces using Fortran, and it will no doubt be most useful to anyone who needs to build such interfaces.' *Journal of the American Statistical Association*, June 2006 'The book is well written and is divided into chapters and sections which are coherent...Overall the book seems like a good resource for someone that already knows some dialect of FORTRAN and wants to learn a bit about what is new in FORTRAN 95...' Robert Gentleman for the *Journal of Statistical Software*, December 2006

From reader reviews:

Jose York:

Now a day those who Living in the era just where everything reachable by talk with the internet and the resources in it can be true or not require people to be aware of each details they get. How many people to be smart in getting any information nowadays? Of course the correct answer is reading a book. Reading a book can help individuals out of this uncertainty Information specifically this Developing Statistical Software in Fortran 95 (Statistics and Computing) book because book offers you rich information and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it everbody knows.

Helen Turner:

Would you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you find out the inside because don't evaluate book by its protect may doesn't work this is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer could be Developing Statistical Software in Fortran 95 (Statistics and Computing) why because the excellent cover that make you consider about the content will not disappoint anyone. The inside or content is fantastic as the outside as well as cover. Your reading sixth sense will directly guide you to pick up this book.

Eleanor Yoo:

Reading a book to get new life style in this season; every people loves to go through a book. When you examine a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your study, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, as well as soon. The Developing Statistical Software in Fortran 95 (Statistics and Computing) provide you with a new experience in reading through a book.

Lynne Young:

In this period of time globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The particular book that recommended to your account is Developing Statistical Software in Fortran 95 (Statistics and Computing) this guide consist a lot of the information in the condition of this world now. This particular book was represented how can the world has grown up. The language styles that writer require to explain it is easy to understand. The actual writer made some exploration when he makes this book. Honestly, that is why this book suitable all of you.
