## **Probability and Statistics in Hydrology** Vujica V. Yevjevich

This timeless book was conceived as a tool for those interested in applying inferential statistics to hydrology and water resources. The text consists of mathematical descriptions of properties of hydrologic random variables, and the use of probability theory and mathematical statistics in solving hydrologic problems. The information is condensed since the main objective was to implement hydrologic data through inferential statistics. This book has withstood the test of time and now has been reprinted in hardcover to be part of WRP's Classic Resource Edition.
