## **The Phytochemical Landscape: Linking Trophic Interactions and Nutrient Dynamics (Monographs in Population Biology)** Mark D. Hunter

The dazzling variation in plant chemistry is a primary mediator of trophic interactions, including herbivory, predation, parasitism, and disease. At the same time, such interactions feed back to influence spatial and temporal variation in the chemistry of plants. In this book, Mark Hunter provides a novel approach to linking the trophic interactions of organisms with the cycling of nutrients in ecosystems.

Hunter introduces the concept of the "phytochemical landscape"—the shifting spatial and temporal mosaic of plant chemistry that serves as the nexus between trophic interactions and nutrient dynamics. He shows how plant chemistry is both a cause and consequence of trophic interactions, and how it also mediates ecosystem processes such as nutrient cycling. Nutrients and organic molecules in plant tissues affect decomposition rates and the fluxes of elements such as carbon, nitrogen, and phosphorus. The availability of these same nutrients influences the chemistry of cells and tissues that plants produce. In combination, these feedback routes generate pathways by which trophic interactions influence nutrient dynamics and vice versa, mediated through plant chemistry. Hunter provides evidence from terrestrial and aquatic systems for each of these pathways, and describes how a focus on the phytochemical landscape enables us to better understand and manage the ecosystems in which we live.

Essential reading for students and researchers alike, this book offers an integrated approach to population-, community-, and ecosystem-level ecological processes.

### **From reader reviews:**

#### **Bobby Tremblay:**

As people who live in typically the modest era should be upgrade about what going on or info even knowledge to make these individuals keep up with the era which is always change and progress. Some of you maybe will probably update themselves by reading through books. It is a good choice for you personally but the problems coming to an individual is you don't know what one you should start with. This The Phytochemical Landscape: Linking Trophic Interactions and Nutrient Dynamics (Monographs in Population Biology) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

#### **Thomas Hawkins:**

Hey guys, do you would like to finds a new book to learn? May be the book with the title The Phytochemical Landscape: Linking Trophic Interactions and Nutrient Dynamics (Monographs in Population Biology) suitable to you? Typically the book was written by well-known writer in this era. The particular book untitled The Phytochemical Landscape: Linking Trophic Interactions and Nutrient Dynamics (Monographs in Population Biology) is the main one of several books in which everyone read now. This specific book was inspired lots of people in the world. When you read this book you will enter the new dimension that you ever know before. The author explained their strategy in the simple way, therefore all of people can easily to be aware of the core of this reserve. This book will give you a lot of information about this world now. To help you see the represented of the world in this particular book.

#### **John Bergeron:**

The reserve with title The Phytochemical Landscape: Linking Trophic Interactions and Nutrient Dynamics (Monographs in Population Biology) has a lot of information that you can study it. You can get a lot of profit after read this book. That book exist new understanding the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to understand how the improvement of the world. This book will bring you inside new era of the syndication. You can read the e-book in your smart phone, so you can read that anywhere you want.

#### **Jeff Brown:**

Is it you actually who having spare time then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This The Phytochemical Landscape: Linking Trophic Interactions and Nutrient Dynamics (Monographs in Population Biology) can be the reply, oh how comes? A book you know. You are so out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these guides have than the others?
