## Drosophila Eye Development (Results and Problems in Cell Differentiation)

1 Kevin Moses It is now 25 years since the study of the development of the compound eye in *Drosophila* really began with a classic paper (Ready et al. 1976). In 1864, August Weismann published a monograph on the development of Diptera and included some beautiful drawings of the developing imaginal discs (Weismann 1864). One of these is the first description of the third instar eye disc in which Weismann drew a vertical line separating a posterior domain that included a regular pattern of clustered cells from an anterior domain without such a pattern. Weismann suggested that these clusters were the precursors of the adult ommatidia and that the line marks the anterior edge of the eye. In his first suggestion he was absolutely correct - in his second he was wrong. The vertical line shown was not the anterior edge of the eye, but the anterior edge of a moving wave of patterning and cell type specification that 112 years later (1976) Ready, Hansen and Benzer would name the "morphogenetic furrow". While it is too late to hear from August Weismann, it is a particular pleasure to be able to include a chapter in this Volume from the first author of that 1976 paper: Don Ready! These past 25 years have seen an astonishing explosion in the study of the fly eye (see Fig.

### **From reader reviews:**

#### **Freddie Straughter:**

What do you in relation to book? It is not important with you? Or just adding material when you really need something to explain what your own problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Everybody has many questions above. The doctor has to answer that question simply because just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is correct. Because start from on jardín de infancia until university need this specific Drosophila Eye Development (Results and Problems in Cell Differentiation) to read.

#### **Jean Cunningham:**

Information is provisions for folks to get better life, information these days can get by anyone from everywhere. The information can be a knowledge or any news even an issue. What people must be consider whenever those information which is from the former life are difficult to be find than now could be taking seriously which one is acceptable to believe or which one often the resource are convinced. If you receive the unstable resource then you get it as your main information we will see huge disadvantage for you. All those possibilities will not happen within you if you take Drosophila Eye Development (Results and Problems in Cell Differentiation) as the daily resource information.

#### **Arnold Allison:**

A lot of people always spent their very own free time to vacation or even go to the outside with them family members or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you need to try to find a new activity this is look different you can read the book. It is really fun to suit your needs. If you enjoy the book you read you can spent the entire day to reading a publication. The book Drosophila Eye Development (Results and Problems in Cell Differentiation) it is rather good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. If you did not have enough space bringing this book you can buy the particular e-book. You can m0ore very easily to read this book from the smart phone. The price is not very costly but this book features high quality.

#### **Brenda Lewis:**

Can you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Aim to pick one book that you never know the inside because don't assess book by its handle may doesn't work this is difficult job because you are scared that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer may be Drosophila Eye Development (Results and Problems in Cell Differentiation) why because the wonderful cover that make you consider regarding the content will not disappoint you. The inside or content will be fantastic as the outside or cover. Your reading sixth sense will

directly guide you to pick up this book.
