The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) Stephen P. Hubbell

Despite its supreme importance and the threat of its global crash, biodiversity remains poorly understood both empirically and theoretically. This ambitious book presents a new, general neutral theory to explain the origin, maintenance, and loss of biodiversity in a biogeographic context.

Until now biogeography (the study of the geographic distribution of species) and biodiversity (the study of species richness and relative species abundance) have had largely disjunct intellectual histories. In this book, Stephen Hubbell develops a formal mathematical theory that unifies these two fields. When a speciation process is incorporated into Robert H. MacArthur and Edward O. Wilson's now classical theory of island biogeography, the generalized theory predicts the existence of a universal, dimensionless biodiversity number. In the theory, this fundamental biodiversity number, together with the migration or dispersal rate, completely determines the steady-state distribution of species richness and relative species abundance on local to large geographic spatial scales and short-term to evolutionary time scales.

Although neutral, Hubbell's theory is nevertheless able to generate many nonobvious, testable, and remarkably accurate quantitative predictions about biodiversity and biogeography. In many ways Hubbell's theory is the ecological analog to the neutral theory of genetic drift in genetics. The unified neutral theory of biogeography and biodiversity should stimulate research in new theoretical and empirical directions by ecologists, evolutionary biologists, and biogeographers.

From reader reviews:

Gary Glover:

Have you spare time for a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to typically the Mall. How about open or maybe read a book called The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology)? Maybe it is to be best activity for you. You already know beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have different opinion?

Constance Music:

That e-book can make you to feel relax. This particular book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) was colourful and of course has pictures on the website. As we know that book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) has many kinds or style. Start from kids until teens. For example Naruto or Investigation company Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading in which.

Jean Fair:

A lot of reserve has printed but it differs. You can get it by online on social media. You can choose the very best book for you, science, comic, novel, or whatever by searching from it. It is known as of book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology). You can contribute your knowledge by it. Without leaving behind the printed book, it may add your knowledge and make you happier to read. It is most essential that, you must aware about reserve. It can bring you from one location to other place.

Robert Tanaka:

What is your hobby? Have you heard that will question when you got scholars? We believe that that query was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. So you know that little person such as reading or as studying become their hobby. You must know that reading is very important as well as book as to be the thing. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You find good news or update concerning something by book. Different categories of books that can you decide to try be your object. One of them is actually The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology).
