Issues in EU and US Foreign Policy Münevver Cebeci

Issues in E.U. and U.S. Foreign Policy, edited by MYnevver Cebeci, aims at analyzing the perceptions, interests, and policies of the EU and the US on various international issues. It portrays their convergences and divergences, and reflects on their interplay. The book has a geographical focus rather than a thematic one; however, some themes such as weapons of mass destruction, dual use technology transfer, energy security, and democratization, are unavoidable within their respective geographical contexts. For example, the authors inquire into the case of Iran with a special focus on nuclear proliferation; they investigate Russia with a significant emphasis on energy security; Iraq is examined with a discussion on the withdrawal of occupation troops; and, finally, the authors address the case of China with a debate on dual use technology transfer. Issues in European Union and U.S. Foreign Policy is composed of two parts: The first involves an inventive theoretical framework for understanding EU and US foreign policy. The analysis extends beyond traditional approaches that seek to explain US and EU foreign policy through various dichotomies such as soft power versus hard power without overlooking the significance of such dichotomies. This section further discusses how European and American scholars approach transatlantic relations in different ways. The second section covers an intensive comparative analysis of EU and US foreign policy on specific issue areas. Some chapters also deal with the impact of their policy divergences and convergences on transatlantic relations and NATO. Nevertheless, the book aims to go beyond the parochial debates of burden-sharing or division of labor in transatlantic relations. It focuses on_ and actually proposes_ a broader framework of cooperation and coordination for the EU and the US.
