**Real Time Data Mining** Saed Sayad
Data mining is about explaining the past and predicting the future by exploring and analyzing data. Data mining is a multi-disciplinary field which combines statistics, machine learning, artificial intelligence and database technology. Although data mining algorithms are widely used in extremely diverse situations, in practice, one or more major limitations almost invariably appear and significantly constrain successful data mining applications. Frequently, these problems are associated with large increases in the rate of generation of data, the quantity of data and the number of attributes (variables) to be processed: Increasingly, the data situation is now beyond the capabilities of conventional data mining methods. The term Real Time is used to describe how well a data mining algorithm can accommodate an ever increasing data load instantaneously. Upgrading conventional data mining to real time data mining is through the use of a method termed the Real Time Learning Machine or RTLM. The use of the RTLM with conventional data mining methods enables Real Time Data Mining. The future of predictive modeling belongs to real time data mining and the main motivation in authoring this book is to help you to understand the method and to implement it for your applications.

**From reader reviews:**

**Karen Imes:**

Here thing why this Real Time Data Mining are different and trusted to be yours. First of all studying a book is good but it really depends in the content of it which is the content is as delicious as food or not. Real Time Data Mining giving you information deeper since different ways, you can find any book out there but there is no reserve that similar with Real Time Data Mining. It gives you thrill reading through journey, its open up your own personal eyes about the thing that will happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your method home by train. When you are having difficulties in bringing the imprinted book maybe the form of Real Time Data Mining in e-book can be your alternate.

**Howard Martinez:**

Now a day those who Living in the era wherever everything reachable by connect to the internet and the resources included can be true or not require people to be aware of each details they get. How a lot more to be smart in getting any information nowadays? Of course the reply is reading a book. Reading through a book can help individuals out of this uncertainty Information specifically this Real Time Data Mining book because book offers you rich information and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it you know.

**James Edwards:**

Playing with family in a very park, coming to see the sea world or hanging out with friends is thing that usually you could have done when you have spare time, subsequently why you don't try point that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Real Time Data Mining, you are able to enjoy both. It is great combination right, you still wish to miss it? What kind of hang type is it? Oh come on its mind hangout fellas. What? Still don't have it, oh come on its referred to as reading friends.

**Amy Smith:**

Beside this particular Real Time Data Mining in your phone, it can give you a way to get closer to the new knowledge or info. The information and the knowledge you will got here is fresh in the oven so don't always be worry if you feel like an aged people live in narrow village. It is good thing to have Real Time Data Mining because this book offers to you personally readable information. Do you at times have book but you do not get what it's facts concerning. Oh come on, that will not happen if you have this with your hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss this? Find this book along with read it from at this point!
