Dafydd Stuttard, Marcus Pinto

The Web Application Hacker's Handbook: Finding and Exploiting Security Flaws Dafydd Stuttard, Marcus Pinto

The highly successful security book returns with a new edition, completely updated

Web applications are the front door to most organizations, exposing them to attacks that may disclose personal information, execute fraudulent transactions, or compromise ordinary users. This practical book has been completely updated and revised to discuss the latest step-by-step techniques for attacking and defending the range of ever-evolving web applications. You'll explore the various new technologies employed in web applications that have appeared since the first edition and review the new attack techniques that have been developed, particularly in relation to the client side.

- Reveals how to overcome the new technologies and techniques aimed at defending web applications against attacks that have appeared since the previous edition
- Discusses new remoting frameworks, HTML5, cross-domain integration techniques, UI redress, framebusting, HTTP parameter pollution, hybrid file attacks, and more
- Features a companion web site hosted by the authors that allows readers to try out the attacks described, gives answers to the questions that are posed at the end of each chapter, and provides a summarized methodology and checklist of tasks

Focusing on the areas of web application security where things have changed in recent years, this book is the most current resource on the critical topic of discovering, exploiting, and preventing web application security flaws.

Also available as a set with, *CEHv8: Certified Hacker Version 8 Study Guide, Ethical Hacking and Web Hacking Set*, 9781119072171.

Gloria White:

Spent a free time to be fun activity to perform! A lot of people spent their down time with their family, or all their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your free time/ holiday? May be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to test look for book, may be the publication untitled The Web Application Hacker's Handbook: Finding and Exploiting Security Flaws can be fine book to read. May be it might be best activity to you.

Henry Heath:

As a university student exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some guide, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that examining is not important, boring and can't see colorful photographs on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this The Web Application Hacker's Handbook: Finding and Exploiting Security Flaws can make you really feel more interested to read.
