Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary Robert Pool, Committee on Revisions to the Common Rule for the Protection of Human Subjects in Research in the Behavioral and Social Sciences, Cognitive, and Sensory Sciences Board on Behavioral, Division on Behavioral and Social Sciences and Education, National Research Council

On July 26, 2011, the U.S. Department of Health and Human Services issued an advance notice of proposed rulemaking (ANPRM) with the purpose of soliciting comments on how current regulations for protecting research participants could be modernized and revised. The rationale for revising the regulations was as follows: this ANPRM seeks comment on how to better protect human subjects who are involved in research, while facilitating valuable research and reducing burden, delay, and ambiguity for investigators. The current regulations governing human subjects research were developed years ago when research was predominantly conducted at universities, colleges, and medical institutions, and each study generally took place at only a single site. Although the regulations have been amended over the years, they have not kept pace with the evolving human research enterprise, the proliferation of multisite clinical trials and observational studies, the expansion of health services research, research in the social and behavioral sciences, and research involving databases, the Internet, and biological specimen repositories, and the use of advanced technologies, such as genomics.

Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary focuses on six broad topic areas:

1. Evidence on the functioning of the Common Rule and of institutional review boards (IRBs), to provide context for the proposed revisions.
2. The types and levels of risks and harms encountered in social and behavioral sciences, and issues related to the severity and probability of harm, because the ANPRM asks for input on calibration of levels of review to levels of risk.
3. The consent process and special populations, because new rules have been proposed to improve informed consent (e.g., standard consent form, consent for future uses of biospecimens, and re-consenting for further use of existing research data).
4. Issues related to the protection of research participants in studies that involve use of existing data and data sharing, because the ANPRM proposed applying standards for protecting the privacy of healthcare data to research data.
5. Multidisciplinary and multisite studies, because the ANPRM proposed a revision to the regulations that would allow multisite studies to be covered by a single IRB.
6. The purview and roles of IRBs, because the ANPRM included possible revisions to categories of research that could entail changes in IRB oversight.

From reader reviews:

Lourdes Williams:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary. Try to the actual book Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary as your buddy. It means that it can being your friend when you sense alone and beside those of course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know every thing by the book. So , we should make new experience along with knowledge with this book.

Karen McCarthy:

People live in this new morning of lifestyle always try to and must have the free time or they will get wide range of stress from both everyday life and work. So , when we ask do people have extra time, we will say absolutely indeed. People is human not just a robot. Then we question again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then ever try this one, reading publications. It can be your alternative with spending your spare time, the book you have read will be Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary.

Bruce Butera:

Do you one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Aim to pick one book that you never know the inside because don't determine book by its deal with may doesn't work the following is difficult job because you are afraid that the inside maybe not since fantastic as in the outside look likes. Maybe you answer might be Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary why because the wonderful cover that make you consider with regards to the content will not disappooint you actually. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly make suggestions to pick up this book.

Margaret Parker:

In this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become considered one of it? It is just simple solution to have that. What you have to do is just spending your time little but quite enough to enjoy a look at some books. On the list of

books in the top collection in your reading list is actually Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary. This book and that is qualified as The Hungry Inclines can get you closer in growing to be precious person. By looking up and review this guide you can get many advantages.
