Handbook on Preterm Prelabor Rupture of Membranes in a Low Resource Setting Shyam V Desai, Parikshit Tank

This Handbook on Preterm Prelabor Rupture of Membranes in a Low Resource Setting is very important from the Obstetrician's point of view. It concerns one of the 5 Ps, i.e. postpartum hemorrhage, preterm labor, pregnancy hypertension, PROM and parturition problems which cause most of the maternal and perinatal mortality and morbidity not only in the AOFOG federation but also in the whole world. This handbook looks at the disease from an Asian perspective. Most of the literature on the topic have been from a Western view and it is refreshing to look at it from another angle. This book addresses a complication of pregnancy, which tests the skill of the obstetrician as far as decision-making is concerned. The extent of neonatal services available largely determines the course of management that eventually choose in such a patient. In a low resource setting, where obstetric and neonatal services are not at their best decision making, the management is more difficult. This book will provide useful and comprehensive guidance to the frontline workers in Obstetrics and Gynecology to help them to manage this important and challenging condition.
