Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies

Victoria E. O'Collins, Geoffrey A. Donnan, Malcolm R. Macleod, David W. Howells

A quantitative and qualitative comparison of contemporary neuroprotection and thrombolytic stroke trials and their preclinical animal counterparts has been undertaken, with meta-analysis (DerSimonian and Laird, 1986) used to evaluate imaging and histological outcomes. Results from 35 clinical trials including 5,532 patients were compared with data from 3,145 pre-clinical acute-stroke experiments in 45,476 animals. While clinical trials tended to be of higher methodological quality and have larger sample sizes than animal experiments (71 patients vs. 7 animals per group), both were similarly underpowered owing to the greater variability in human stroke (average standard deviation of mean in humans 99% v 30% in animals). Proportionally, animal infarcts were almost four times larger than human infarcts in untreated control groups (27% v 8% of the hemisphere) although there was considerable variability in size owing to comorbidities and stroke type. Eighty-six percent of animal studies and 54% of clinical trials reported smaller infarcts in groups receiving treatment, with 41% of clinical trials reporting an improvement in the pre-specified hypothesis. Animal experiments were not effective in predicting individual trial results, nor the level of neuroprotection, however, there was a fair agreement between the direction of the animal and clinical outcomes when looking at the overall direction of drug outcome. As a drug screening tool, experimental stroke studies need refinement. Rational frameworks for translational research will help.

From reader reviews:

Curtis Locke:

Reading a e-book can be one of a lot of pastime that everyone in the world loves. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new information. When you read a e-book you will get new information because book is one of many ways to share the information as well as their idea. Second, looking at a book will make you actually more imaginative. When you reading through a book especially fiction book the author will bring someone to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to other folks. When you read this Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies, it is possible to tells your family, friends along with soon about yours e-book. Your knowledge can inspire average, make them reading a e-book.

Rebecca Lopez:

Reading a reserve tends to be new life style with this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Using book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Many author can inspire their reader with their story or even their experience. Not only situation that share in the guides. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors in this world always try to improve their proficiency in writing, they also doing some research before they write on their book. One of them is this Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies.

Cheryl Thornton:

People live in this new time of lifestyle always try to and must have the extra time or they will get large amount of stress from both way of life and work. So , once we ask do people have time, we will say absolutely sure. People is human not a robot. Then we question again, what kind of activity are there when the spare time coming to a person of course your answer will unlimited right. Then ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, typically the book you have read is definitely Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies.

Eric Sanders:

As a scholar exactly feel bored for you to reading. If their teacher requested them to go to the library or to

make summary for some e-book, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies can make you truly feel more interested to read.
