**Individual Paediatrics: Physical, Emotional and Spiritual Aspects of Diagnosis and Counseling -- Anthroposophic-homeopathic Therapy, Fourth Edition** Georg Soldner, Herrmann Michael Stellman

In the medical treatment of children and teenagers and the accompaniment of their parents, alternative therapies, homoeopathy, anthroposophic medicine, psychology and psychosomatics play an ever greater role alongside conventional, science-based medicine. Before a therapy can be successful, an individual diagnosis must be made, taking somatic symptoms, mental and emotional aspects and the developmental stage of the child into account. The background and context of the illness must be determined as well: Why has this child developed this particular disease at this particular moment? In this way your therapy can activate the child's own disease-fighting resources and support it in developing its potential.

Ten years after the first edition, **Individual Pediatrics** has been completely revised for its fourth edition. Current developments in the field of epigenetics, questions about vaccination, sun protection, and vitamin D are covered, as are newly developed and refined treatment concepts for disorders such as inadequate ventilation of the middle ear, bronchial asthma, neurodermatitis, and ADHS. New case reports have been added, and all drug data have been updated.
