Science Foundations: Chemistry

Jean Martin, Bryan Milner

Science Foundations: Chemistry Jean Martin, Bryan Milner

The new edition of Science Foundations provides comprehensive coverage of single- and double-award GCSE science. It is fully revised and updated to match the new GCSE specifications, for teaching from September 2001. It contains all the material required for the foundation and higher tiers, with clear progression and explicit differentiation. 'Higher tier only' material is clearly marked in separate spreads. The language level is carefully controlled, with illustrations and layout specifically designed to make the concepts accessible. There are frequent opportunities for students to confirm their understanding of each key idea as it is introduced, via short questions and summary passages on each spread. The books include guidance for students on how to prepare for and answer their GCSE examinations, and a glossary of key words for ease of reference.
