**Environmental Health: Bridging the Gaps (World Bank Discussion Papers)** James Listorti

Environmental health remains at the periphery of sustainable development for a number of reasons. It is inadequately defined, rarely quantified, and institutionally fragmented.

'Environmental Health' helps fill a void in economic development thinking. It provides procedures to address multisectoral problems that require multisectoral solutions. It addresses those problems by:

- proposing a new approach to targeted collaboration among different sectors;
- devising new tools or enhancing existing ones to help different sectors contribute to the alleviation of health problems; and
- putting theory into practice through a pilot in Ghana.
